Sugar Tax: This issue is simple. No one likes the *Sweetened Beverage Tax* and the programs funded by it are ineffective with preventing obesity. It also is a regressive tax, meaning it targets the poor more than the rich. I say it's time for repeal!

Legalization of Poker Casinos: There is simply no reason for abolitionist laws like this in our modern day, free society. Taxation of these casinos could be quite useful to a city currently struggling with major issues like homelessness. Help common sense prevail!

Freeing the Democracy Dollar: The biggest example of a corrupt policy in our city is the way the Democracy Voucher program is organized. The Democracy Voucher program gives citizens \$100 of publicly funded money to give to any local campaign they choose, or at least that's how it's supposed to work. What isn't as well known is that before a city-wide City Council candidate can receive or use any voucher money, they must fill a requirement of 400 ten dollar (real money) donations from registered Seattle voters. The elites and incumbents who already have established bases can fill this requirement quickly, and move forward with their campaigns, leaving true grassroots candidates (who the program is supposed to help support) in the dust. Because of this, not a single incumbent mayor or city council member has been unseated since the birth of this program. I say we do away with this oppressive requirement and let the people give their vouchers to anyone on the ballot!

In closing, I am a hard working populist trying his hardest to make a difference in our chaotic city. If elected, I will fight my hardest against this city's elites and their corrupt policies! Spread the word and help **The Players Party** populist movement thrive, and bring power to the people!
